Shopping malls and zones are changing, "stay in your cave, guys!", shout the advertisements of the last-mile courier services, and even supermarkets are perpetuating and speeding up their delivery services into the night and into the home. This play is not about lamenting the transformation, but dealing with its pace-setter, Amazon and those who make it grow that overpowering. Us.

The catalogue of goods on the marketplace Amazon comprises more than 355 million products - and many more are added every day - an endless dance of the production of goods and desires around the globe, shipped through hundreds of "fulfillment centres". But how do they actually work and what does "fulfillment" consist of?

„The show sends the audience down multiple fascinating rabbit holes before concluding in an endearingly whimsical manner (with costumes – of course – sourced from Amazon).“
(Nov 23, The Stage)

DANIEL WETZEL

A fulfillment circus with with warehouse experts and logistics acrobats, dancing with Marx's tables.
